

Vineyard Signature Tree Care

Above are examples in our neighborhood of **how not to cut** the thundercloud plumb tree, the signature tree of the Vineyard. We inform every year in the newsletter about tree maintenance. Please refrain from this improper “pruning”. These trees should not be topped but properly pruned instead. If you have topped your tree, note that the HOA may ask you to replace the unsightly and damaged tree. For how to correctly prune an ornamental tree visit: <https://www.youtube.com/watch?v=JhJcjjWRBvE> . You can also consult either Davey Tree Company or Bartlett Tree Experts. Please note that removed trees or destroyed trees need to be replaced.

You can find reference trees by the benches in the greenspace in the middle of our HOA. These trees above are properly maintained by a professional arborist. **This is how your trees should look.** Thank you for your attention.
